Well, Obama is history, and gone with him any hope of a last-minute legalization. With the new president, all we can do is wait and see what happens. There may be some hope for legal medical use with Trump. "Marijuana is such a big thing. I think medical should happen — right? Don’t we agree? I think so. And then I really believe we should leave it up to the states."

I’m just sitting here looking at my 5 little clones on the window sill, hoping that legalization actually will be left up to the states, so everyone can the freedom that I have. As of today, over half of the states (28) have legalized some form of medical use, while 8 states, and interestingly, Washington DC, have legalized both medical and adult recreational use.

Eventually, our federal government must bow to reality, and the will of the people, and de-schedule cannabis. If it does not, it will be guilty of ignoring the voice of a clear majority of its citizens, as well as the medical facts.

So just how “free” are we, when the government can decree that we are not permitted to grow a safe and effective medicinal herb in our own backyards and homes? The laws prohibiting cannabis are certainly not due to any concerns over “public safety”, since we are perfectly free to grow ornamental plants that can kill, such as oleander, foxglove and castor bean plants.

Whether you approve of our new president and his actions, or not, becoming more politically, socially, and environmentally conscious, and more active on a local level, seems an appropriate reaction to his presidency. Reach out to others of a like mind. Without my friends helping me, this List would reach far fewer of you. (Hugs to “Old Hippie of the “Beyond Chronic” blog for much-needed technical assistance, and Anne Marie for creating the Facebook page.)

From that getting that annoying pothole fixed, to ending human trafficking, there are more than enough things on this earth that need fixing. Find your “good cause” and help heal the world.

Making it easy for you to learn more about cannabis is my goal. And don’t let the size of my List frighten you – it’s really quite easy to use. Everything has been sorted into categories to make it easier for you. Just start with the news articles, then move on to the studies as you learn more.

The List is here as a gateway to your education about cannabis, not an endpoint. Because of the irrational prohibition of cannabis, we are only beginning to understand the potential of this pleasant, healing herb. Already, our fascination with cannabis and its “high” has led to a completely new, major branch of medical science, the study of the endocannabinoid system.

Science is all about the facts. Our drug laws should be based on science, not racism, politics, religion, or personal bias. For 80 years, the truth about cannabis has been suppressed and ignored. And as my grandfather once said, “If the truth won’t do, then something is wrong!”

Granny Storm Crow

OMEGA-6 / ENDOCANNABINOID CONNECTION - Endocannabinoids are made from Omega 6, so you do need it. But it is also pro-inflammatory, so too much is not good for you. Most folks get too much. Scientists recommend between a “1 to 1” to a “4 parts Omega 6 to 1 part Omega 3” ratio for the best health. Our modern diet can give us up to 50 parts Omega 6 to 1 part Omega 3.

Cannabinoids suppress inflammatory and neuropathic pain by targeting α3 glycine receptors. (full – 2012) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3371734/

Activation of cannabinoid receptor 2 attenuates leukocyte-endothelial cell interactions and blood-brain barrier dysfunction under inflammatory conditions. (full – 2012) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3325902/

Signaling through cannabinoid receptor 2 suppresses murine dendritic cell migration by inhibiting matrix metalloproteinase 9 expression. (full – 2012) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3488886/

Mast cell-glia axis in neuroinflammation and therapeutic potential of the anandamide congener palmitoylethanolamide. (full - 2012) http://rstb.royalsocietypublishing.org/content/367/1607/3312.long

Endocannabinoids limit excessive mast cell maturation and activation in human skin. (full – 2012) http://www.jacionline.org/article/S0091-6749%2811%2901796-9/fulltext

Cannabinoids suppress inflammatory and neuropathic pain by targeting α3 glycine receptors (full – 2012) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3371734/

Cannabinoid receptor-2-selective agonists improve recovery in experimental autoimmune encephalomyelitis. (abst – 2012)  http://www.jimmunol.org/content/188/1_Supplement/116.7.abstract?sid=b1a0d6e8-40b1-4641-82a4-b6b539cebc6e

Electroacupuncture reduces the expression of proinflammatory cytokines in inflamed skin tissues through activation of cannabinoid CB2 receptors. (abst – 2012) http://www.ncbi.nlm.nih.gov/pubmed/22337285

Molecular evidence for the involvement of PPAR-δ and PPAR-γ in anti-inflammatory and neuroprotective activities of palmitoylethanolamide after spinal cord trauma (full – 2013) http://www.jneuroinflammation.com/content/10/1/20

The cannabinoid receptor type 2 as mediator of mesenchymal stromal cell immunosuppressive properties. (full – 2013) http://www.plosone.org/article/info%3Adoi%2F10.1371%2Fjournal.pone.0080022

The cannabinoid TRPA1 agonist cannabichromene inhibits nitric oxide production in macrophages and ameliorates murine colitis. (full – 2013) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3632250/

Monoacylglycerol Lipase (MAGL) Inhibition Attenuates Acute Lung Injury in Mice. (full – 2013) 
http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3808422/

The monoacylglycerol lipase inhibitor JZL184 suppresses inflammatory pain in the mouse carrageenan model. (full – 2013) 
http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3717616/

The cannabinoid CB2 receptor-selective phytocannabinoid beta-caryophyllene exerts analgesic effects in mouse models of inflammatory and neuropathic pain (full – 2013) 
http://www.europeanneuropsychopharmacology.com/article/S0924-977X%2813%2900302-7/fulltext

The Dual Effect of Cannabinoid Receptor-1 Deficiency on the Murine Postoperative Ileus (full – 2013) 
http://www.plosone.org/article/info%3Adoi%2F10.1371%2Fjournal.pone.0067427

Palmitoylethanolamide and luteolin ameliorate development of arthritis caused by injection of collagen type II in mice (full – 2013) 
http://arthritis-research.com/content/15/6/R192

The Influence of Cannabinoids on Generic Traits of Neurodegeneration. (full – 2013) 

A new co-ultramicronized composite including palmitoylethanolamide and luteolin to prevent neuroinflammation in spinal cord injury (full – 2013) 
http://www.jneuroinflammation.com/content/10/1/91

Implication of the anti-inflammatory bioactive lipid prostaglandin D2-glycerol ester in the control of macrophage activation and inflammation by ABHD6. (full – 2013) 
http://www.pnas.org/content/110/43/17558.long

Selective Activation of Cannabinoid Receptor 2 in Leukocytes Suppresses Their Engagement of the Brain Endothelium and Protects the Blood-Brain Barrier. (full – 2013) 
http://ajp.amjpathol.org/article/S0002-9440%2813%2900557-9/fulltext

Cannabinoid receptor 2 suppresses leukocyte inflammatory migration by modulating the JNK/c-Jun/Alox5 pathway. (full – 2013) 
http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3650391/

Cannabinoid 1 Receptors in Keratinocytes Modulate Proinflammatory Chemokine Secretion and Attenuate Contact Allergic Inflammation. (full – 2013) 
http://www.jimmunol.org/content/190/10/4929.long

Cannabidiol provides long-lasting protection against the deleterious effects of inflammation in a viral model of multiple sclerosis: A role for A2A receptors. (full – 2013) 

Inhibition of p38/Mk2 signaling pathway improves the anti-inflammatory effect of WIN55 on mouse experimental colitis. (full – 2013) 
http://www.nature.com/labinvest/journal/v93/n3/full/labinvest2012177a.html
Effects on Immune Cells of a New 1,8-Naphthyridin-2-One Derivative and Its Analogues as Selective CB2 Agonists: Implications in Multiple Sclerosis. (full – 2013) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3641032/

CB1 Cannabinoid Receptor Agonist Prevents NGF-Induced Sensitization of TRPV1 in Sensory Neurons. (full – 2013) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3752375/

Anti-inflammatory effects of Cannabinoid 2 Receptor activation in endotoxin-induced uveitis. (full – 2013) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3954484/

Cannabinoid receptor modulation of the endothelial cell inflammatory response (full – 2013) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC2791499/

Reduces Formalin-Induced Neuropathic-Like Behaviour Through Spinal Glial/Microglial Phenotypical Changes in Mice (link to PDF – 2013) http://www.eurekaselect.com/107975/article

Neuroglial Roots of Neurodegenerative Diseases: Therapeutic Potential of Palmitoylethanolamide in Models of Alzheimer’s Disease (link to PDF– 2013) http://www.eurekaselect.com/107977/article

New Insights in Mast Cell Modulation by Palmitoylethanolamide. (link to PDF – 2013) http://www.eurekaselect.com/107979/article

Cannabinoid CB2 receptors as novel target for inhibiting house dust mite induced allergic airway inflammation (abst – 2013) http://www.jimmunol.org/content/190/1_Supplement/120.12

The endocannabinoid/endovanilloid N-arachidonoyl dopamine (NADA) and synthetic cannabinoid WIN55,212-2 abate the inflammatory activation of human endothelial cells. (full – 2014) http://www.jbc.org/content/early/2014/03/18/jbc.M113.536953.long

Inhibition of Fatty Acid binding proteins elevates brain anandamide levels and produces analgesia. (full – 2014) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3976407/

Cannabinoid-induced autophagy regulates suppressor of cytokine signaling (SOCS)-3 in intestinal epithelium. (full – 2014) http://ajpgi.physiology.org/content/307/2/G140

CB2 Receptor Activation Ameliorates the Proinflammatory Activity in Acute Lung Injury Induced by Paraquat. (full – 2014) http://www.hindawi.com/journals/bmri/2014/971750/

Cannabidiol exerts sebostatic and antiinflammatory effects on human sebocytes. (full – 2014) http://www.jci.org/articles/view/64628

Activation of GPR40 attenuates chronic inflammation induced impact on pancreatic β-cells health and function. (full – 2014) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC4083038/
Cannabinoid receptor 2 as a potential therapeutic target in rheumatoid arthritis.  
(full – 2014)  http://www.biomedcentral.com/1471-2474/15/275

Endocannabinoids and inflammatory response in periodontal ligament cells.  

Protective effects of cannabidiol on lesion-induced intervertebral disc degeneration.  

Celastrol Attenuates Inflammatory and Neuropathic Pain Mediated by Cannabinoid Receptor Type 2.  (full– 2014)  http://www.mdpi.com/1422-0067/15/8/13637/htm

Cannabidiol: Pharmacology and potential therapeutic role in epilepsy and other neuropsychiatric disorders  (full – 2014)  
http://www.ncbi.nlm.nih.gov/pmc/articles/PMC4707667/

Palmitoylethanolamide controls reactive gliosis and exerts neuroprotective functions in a rat model of Alzheimer's disease.  (full – 2014)  
http://www.nature.com/cddis/journal/v5/n9/full/cddis2014376a.html

Tapping into the endocannabinoid system to ameliorate acute inflammatory flares and associated pain in mouse knee joints.  (full – 2014)  
http://www.ncbi.nlm.nih.gov/pmc/articles/PMC4201700/

Cannabinoid receptor type-2 stimulation, blockade, and deletion alters the vascular inflammatory responses to traumatic brain injury.  (full – 2014)  
http://www.ncbi.nlm.nih.gov/pmc/articles/PMC4248435/

Palmitoylethanolamide, a naturally-occurring lipid, is an orally effective intestinal anti-inflammatory agent.  (full – 2014)  

Cannabinoids Alleviate Experimentally Induced Intestinal Inflammation by Acting at Central and Peripheral Receptors.  (full – 2014)  
http://www.ncbi.nlm.nih.gov/pmc/articles/PMC4183544/

Cannabinoid inhibits HIV-1 Tat-stimulated adhesion of human monocyte-like cells to extracellular matrix proteins.  (full – 2014)  
http://www.ncbi.nlm.nih.gov/pmc/articles/PMC4089388/

Cannabidiol enhances microglial phagocytosis via transient receptor potential (TRP) channel activation  (full – 2014)  
http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3997281/

Endocannabinoid signalling and the deteriorating brain.  (full – 2014)  
http://www.ncbi.nlm.nih.gov/pmc/articles/PMC4471876/
Chronic administration of Δ9-tetrahydrocannabinol induces intestinal anti-inflammatory microRNA expression during acute SIV infection of rhesus macaques. (full – 2014) http://jvi.asm.org/content/89/2/1168.long

The cannabinoid CB₂ receptor-selective phytocannabinoid beta-caryophyllene exerts analgesic effects in mouse models of inflammatory and neuropathic pain. (full – 2014) http://www.europeanneuropsychopharmacology.com/article/S0924-977X%2813%2900302-7/fulltext

Systemic Administration of Oleoylethanolamide Protects from Neuroinflammation and Anhedonia Induced by LPS in Rats (full – 2014) http://ijnp.oxfordjournals.org/content/18/6/pyu111

Cannabinoid type 2 receptor stimulation attenuates brain edema by reducing cerebral leukocyte infiltration following subarachnoid hemorrhage in rats. (full – 2014) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC4067767/

N-Acylethanolamine-hydrolyzing acid amidase inhibition increases colon N-palmitoylethanolamine levels and counteracts murine colitis. (full – 2014) http://www.fasebj.org/content/29/2/650.long

Molecular Basis for the Improvement in Muscle Metaboreflex and Mechanoreflex Control in Exercise-Traine d Humans with Chronic Heart Failure. (full – 2014) http://ajpheart.physiology.org/content/307/11/H1655

Role of Endocannabinoid Activation of Peripheral CB1 Receptors in the Regulation of Autoimmune Disease. (full – 2014) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC4261058/

Treatment with a Heme Oxygenase 1 Inducer Enhances the Antinociceptive Effects of μ-Opioid, δ-Opioid, and Cannabinoid 2 Receptors during Inflammatory Pain (full – 2014) http://jpet.aspetjournals.org/content/351/1/224.long

In Vitro Anticancer Activity of Plant-Derived Cannabidiol on Prostate Cancer Cell Lines (full – 2014) http://file.scirp.org/Html/5-2500510_47691.htm

Cannabinoid receptor activation inhibits cell cycle progression by modulating 14-3-3β (link to PDF – 2014) http://www.degruyter.com/view/j/cmble.2014.19.issue-3/s11658-014-0200-x/s11658-014-0200-x.xml

Trans-Caryophyllene Suppresses Hypoxia-Induced Neuroinflammatory Responses by Inhibiting NF-κB Activation in Microglia. (abst – 2014) http://www.ncbi.nlm.nih.gov/pubmed/24488604

Increased oxidative stress enhances endocannabinoid tone (abst – 2014) http://www.fasebj.org/content/27/1_Supplement/1097.3.abstract?sid=d2f0f68f-30c5-4027-9334-011c9f8fdd2e

The differential characterization of GPR55 receptor in human peripheral blood reveals a distinctive expression in monocytes and NK cells and a proinflammatory role in these innate cells. (abst – 2014) http://www.ncbi.nlm.nih.gov/pubmed/25344934

Protective role of the cannabinoid receptor system in A2E-mediated photo-toxicity to retinal pigment epithelium (RPE) cells in an in-vitro model of age-related macular degeneration (AMD) (abst – 2014) http://iovs.arvojournals.org/article.aspx?articleid=2271845&resultClick=1

NONRETROGRADE ENDOCANNABINOID SIGNALING MODULATES RETINAL GANGLION CELL CALCIUM HOMEOSTASIS THROUGH THE TRPV1 CATION CHANNEL (abst - 2014) http://iovs.arvojournals.org/article.aspx?articleid=2268407&resultClick=1

Palmitoylethanolamide improves colon inflammation through an enteric glia/toll like receptor 4-dependent PPAR-α activation (abst – 2014) http://gut.bmj.com/content/63/8/1300.abstract?sid=a8fb2a13-4493-4045-8855-9a0babe1e5d51

Cannabinoid Receptor CB2 Is Involved in Tetrahydrocannabinol-Induced Anti-Inflammation against Lipopolysaccharide in MG-63 Cells (full – 2015)
Blockade of monoacylglycerol lipase inhibits oligodendrocyte excitotoxicity and prevents demyelination in vivo (full – 2015)
http://www.ncbi.nlm.nih.gov/pmc/articles/PMC4407719/

Monoacylglycerol lipase inhibitor JZL184 reduces neuroinflammatory response in APdE9 mice and in adult mouse glial cells. (full – 2015)

Intake of a Western diet containing cod instead of pork alters fatty acid composition in tissue phospholipids and attenuates obesity and hepatic lipid accumulation in mice. (abst – 2016) http://www.ncbi.nlm.nih.gov/pubmed/27155918

Circulating levels of endocannabinoids and oxylipins altered by dietary lipids in older women are likely associated with previously identified gene targets (abst – 2016) http://www.sciencedirect.com/science/article/pii/S1388198116302013

Docosahexaenoyl Serotonin, an endogenously formed n-3 fatty acid-serotonin conjugate has anti-inflammatory properties by attenuating IL-23–IL-17 signalling in macrophages (abst – 2016) http://www.sciencedirect.com/science/article/pii/S1388198116302499

OMEGA-6/ENDOCANNABINOID CONNECTION + - Arachidonic acid, linoleic acid-
Endocannabinoids are made from Omega 6, so you do need it, but it's also pro-inflammatory, so too much is not
good for you. Modern diets can have up to a 50 parts Omega 6 to 1 part Omega 3, when 3 to 4 parts Omega 6 to 1
part Omega 3 is optimal. Omega 6 is found corn, soy, safflower, grape seed, sunflower, and “mixed vegetable” oils.

Exposure to a high-fat diet decreases sensitivity to Δ9-tetrahydrocannabinol-induced
motor effects in female rats (full - 2010)
